

Dyna IOT Gateway Device

Designed to enhance traffic management systems, our device offers real time traffic information, seamless integration with third party IoT dashboards and expanded functionality through additional terminals.

Discover how our Traffic Light IoT Gateway Device can revolutionize your traffic control operations.

Dyna

IOT Gateway Device

• Real-Time Traffic Information from Dyna 1016 CPU Traffic Controller

The Traffic Light IoT Gateway Device retrieves real-time traffic information from the Dyna 1016 CPU Traffic Controller. Stay informed and make informed decisions with up-to-the-minute insights.

• Open Protocol with Any Third-Party IoT Dashboard

Our device supports an open protocol, enabling seamless integration with various third-party IoT dashboards. Monitor and manage your traffic control system from a centralized interface that suits your needs.

EXPANDED FUNCTIONALITY

The IOT Gateway Device is equipped with AC input, DI DO, RJ 45 and USB terminals, allowing for additional functions and remote indication or control. Connect the device to the Dyna 1016 Traffic Controller and enhance your system with features such as

- TNB Fail Indication
- RCCB Fail Indication
- Remote Phase Control
- Remote Detection Control
- Gateway Connected with 4G Industrial Router and Battery Backup Power Supply Unit

Our device is seamlessly connected with a reliable 4G industrial router with a keep alive function for uninterrupted connectivity. Additionally, it features a Battery Backup Power Supply Unit to ensure uninterrupted operation, even during power outages or fluctuations.

With DynaTech you gain a reliable partner for your traffic control solutions. Our Traffic Light IoT Gateway Device offers advanced technology, seamless integration, expanded functionality, and expert support. Contact us today to learn more and discuss your specific requirements.
